

BACHELOR OF APPLIED SCIENCE

ONLINE

Get Started on Your Online Degree Today!

Looking for a condensed, accelerated pathway to earn a bachelor's degree? Our **Bachelor of Applied Science** can help.

Whether you are a community college student considering your next step or a working professional looking to move to the next rung on the career ladder, the **online Bachelor of Applied Science** degree prepares you with high-quality credentials that lead to good jobs requiring valuable technical skills.

This degree is intended to serve the needs of adults who have completed a technical associate degree program through a community college or the military and need additional education to advance their careers.

How does it work?

Complete your applied associate degree through an accredited community college. Students may transfer up to 60 hours of community college course work to MSU (15 hours of general education core and 45 hours of technical credit).

What's next?

Take 30 hours of upper-level emphasis classes through MSU online from up to three of the following fields:

- Communication
- Counselor Education
- Criminology
- Cybersecurity
- Educational Psychology
- General Business
- General Technology
- Geosciences
- Health Promotion
- History
- Kinesiology
- Manufacturing Fundamentals
- Operations Management Engineering (OME)
- Psychology
- Public Management
- Social Work
- Sociology
- Veterans' Certificate

You will finish your 120-hour degree with electives. **Everything is ONLINE!**
